

Broadcast Tools COA-37 XDS Adapter

The COA-37 XDS is designed to plug in the male 37-pin D-Sub connector on the XDS Pro satellite receiver. The COA-37 XDS is equipped with four, eight position removable screw terminals for connection to the 16 normally open dry relay contacts.

For the ground, you will need to daisy chain the "B" terminals as shown in the picture below. Follow the Broadcast Tools instructions regarding the rest of the installation guidelines
